DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species 1 in Paper No. 5 is acknowledged. The examiner agrees that all pending claims read on the elected species, and have been examined on their merits. Any new claims must also read on the elected species.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 10/158608. Although the conflicting claims are not identical, they are not patentably distinct from each other because a block (claim 1, '703) is a parallelepiped (claim 1, '608).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kingman 2,386,900 in view of Hays 2,553,254. '900 discloses everything claimed, including a curved edge of a radius not less than about 1/8 inch, but does not disclose that two opposing edges are curved, and two opposing edges are sharp. '254, figure 1, in a sanding block teaches a form of a parallelepiped having two expansive and two adjacent sides, with two opposing edges being curved, and two opposing edges being sharp. It would have been obvious to one of ordinary skill in the art to have provided '900 with the curved and sharp edges of '254, to allow the sanding sponge to be used to sand both acute and obtuse angled surfaces. Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the sharp edges of any angle desired, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar sanding tools are cited of interest.
